-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is unclear whose "inner peripheral center" is eccentric to an outer periphery of the preheat ring.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Comita et al (US 6,513,260).

Comita shows the heat treatment apparatus for heating and vapor deposition of a wafer substrate claimed includes a susceptor, a preheat ring, a base with a pocket to support the preheat ring, and a heating apparatus.

With respect to the inner peripheral center that is eccentric to the outer periphery of the preheat ring, having such off-centers would be inherently present when the present ring is

Art Unit: 3742

manufactured since a perfectly ideal ring cannot be made or it would have been obvious to have such off-centers as the result of the imperfect manufacturing process to make the preheat ring.

As Comita shows on Figures 3 and 4, there is showing of the inner peripheral center of the preheat ring corresponding to the center of the susceptor, and the preheat ring having some gap with the base (284) upon which the preheat ring is supported. And, as the preheat ring is moved into the base, the distance between the inner peripheral center of the preheat ring is minimized as the preheat ring is positioned into the base.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hey et al (US 6,022,587), Carlson et al (US 5,421,957) and Thilderkvist et al (US 6,489,241).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sang Y. Paik whose telephone number is 571-272-4783. The examiner can normally be reached on M-F (9:00-4:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on 571-272-4777. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
